

3E MATTERSHERE

Training

Provide your staff and business with the knowledge and skills to promote efficiency and data quality through the proficient use of your 3E MatterSphere application.

Quality professional training to match your business 3E MatterSphere needs.

Provided by friendly 3E MatterSphere specialist trainers in a way that best suits your own business requirements.

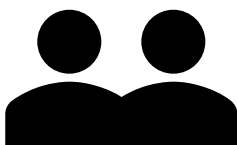

Inductions	•Combination of introduction sessions and one refresher session to ensure all new starters have a basic understanding of 3E MatterSphere
Train the Trainer	•Full in depth training course of all end user 3E MatterSphere features to provide enough knowledge for in house course development
Booster Workshops	•Short workshop based session covering specific topics of your business choice to promote a deeper understanding of 3E MatterSphere
Refreshers	•Up to half day sessions to refresh in key 3E MatterSphere topics or those topics of choice subject to business requirements.
Extended Knowledge	•Specialist training courses for Precedent Production and management at all levels. Also specialist SDK training for inhouse developers.
Specialist Taskflow	•Training designed around any specific taskflows your business has developed or Fusion has developed on your behalf
Bespoke	•Training designed around your business 3E MatterSphere needs. Provided upon discussion with clients and can be a combination of existing courses or specifically developed training.

Training delivered your way:
